# TECHVISION CONSULTING INC.
# STAKEHOLDER INTERVIEW GUIDE

*A Comprehensive Interview Guide*

Prepared for: Manila Manufacturing Corporation (MMC)

Prepared by: Adrian A. Enriquez

Course: DCIT 26 – Application Development and Emerging Technologies

Instructor: Johneros P. Puyo

College: Cavite State University – Silang Campus

Date: September 11, 2026

## Section 1: Introduction and Interview Instructions

### Purpose

This interview guide is designed to help TechVision Consulting Inc. assess the current state, challenges, awareness, and capability of Manila Manufacturing Corporation (MMC) in adopting emerging technologies. The findings gathered from these interviews will directly inform the technology adoption recommendation that TechVision will deliver to MMC. This guide contains 25 core questions.

### Instructions for the Interviewer

1. Review this guide in full before the interview and familiarize yourself with the seven emerging technology areas covered: AI, Machine Learning, Augmented Reality, Internet of Things, Cloud Computing, Big Data Analytics, and Quantum Computing.
2. Target key stakeholders like the CEO, IT Manager/Head, HR, etc.
3. Each interview should take approximately 45–60 minutes. Schedule interviews in a quiet, private setting.
4. Ask every question in the order presented to maintain a structured flow.
5. Use the provided probing follow-up questions (Why? How? Can you elaborate?) whenever an answer is vague, short, or requires explanation.
6. Record responses legibly in the space provided. If a question does not apply to a particular interviewee, mark it 'N/A' and note why.
7. Keep questions unbiased and avoid suggesting technologies yourself.
8. For close-ended/scale questions, read all answer choices aloud before the interviewee responds.
9. At the end of the interview, complete the Closing section and thank the interviewee for their time.
10. All information collected is confidential and will be used solely for the MMC technology adoption recommendation.

## Section 2: Interviewee Information

| | |
|---|---|
| **Full Name** | |
| **Position / Job Title** | |
| **Department** | |
| **Interview Date** | |
| **Interview Time / Duration** | |
| **Interviewer Name** | |

## Section 3: Background and Current State

**Q1**: Can you describe your position at MMC and which parts of the company's operations you are involved in?

**Follow-up**: How do your daily tasks contribute to the overall production of consumer goods?

**Response**: _____

_____

**Notes**: _____

**Q2:** What technologies (hardware, software, machinery, and systems) does MMC currently use in its operations?

**Follow-up**: Which of these technologies are the oldest, and which are the most recent? Why were these specific technologies chosen in the first place?

**Response**: _____

_____

**Notes**: _____

**Q3**: What are the biggest operational problems MMC faces today?

**Follow-up**: Why do you think these difficulties still exist?

**Response**: _____

_____

**Notes**: _____

## Section 4: Technology Awareness and Readiness

**Q4**: How familiar are you with the term “emerging technologies”? In your own words, what does it mean?

**Follow-up**: Can you explain which technologies you consider “emerging” today?

**Response**: _____

_____

**Notes**: _____

**Q5**: Which of the following technologies have you heard of or used, even in a personal capacity? (READ ALL: Artificial Intelligence, Machine Learning, Augmented Reality, Internet of Things, Cloud Computing, Big Data Analytics, Quantum Computing.)

**Follow-up**: Which one do you think is most relevant to MMC, and why?

**Response**: _____

_____

**Notes**: _____

**Q6**: On a scale of 1 to 5 (1 = Not Ready, 5 = Very Ready), how ready do you believe MMC is to adopt these emerging technologies?

**Follow-up**: What are the main factors behind your rating?

**Response**: _____

_____

**Notes**: _____

## Section 5: Industry and Competitive Analysis

**Q7**: Who are MMC's main competitors, and how do they compare with MMC in terms of technology use?

**Follow-up**: How does that affect MMC's market status?

**Response**: _____

_____

**Notes**: _____

**Q8**: Do MMC's customers, suppliers, or business partners currently expect or demand a certain level of technological capability (e.g., online ordering, traceability, faster delivery)?

**Response**: _____

_____

**Notes**: _____

**Q9**: In your view, which emerging technologies would give MMC the strongest competitive advantage, and which might be less relevant to a medium-sized consumer goods manufacturer?

**Follow-up**: What would happen to MMC in the next five to ten years if it does not adopt any emerging technologies?

**Response**: _____

_____

**Notes**: _____

## Section 6: Specific Technology Areas

**Q10**: Where in MMC's business could artificial intelligence (AI) add the most benefit? For example, quality inspection, customer service, production decision-making, etc.

**Follow-up**: Why in that area specifically? Can you explain how you imagine AI working there in practice?

**Response**: _____

_____

**Notes**: _____

**Q11**: Which business problems would you want machine learning models to “learn” from MMC's data to solve? For example, predicting demand, detecting defects, improving processes, etc.

**Response**: _____

_____

**Notes**: _____

**Q12**: How could augmented reality (AR) applications help MMC's workforce?

**Follow-up**: Why do you think AR-based systems would or would not fit MMC's environment?

**Response**: _____

_____

**Notes**: _____

**Q13**: Which physical assets at MMC (machines, equipment, warehouse items, delivery vehicles) would benefit most from being connected with sensors and able to communicate in real time?

**Response**: _____

_____

**Notes**: _____

**Q14**: Does MMC currently host its systems and data on its own premises, or are any services already delivered over the Internet via the cloud, and what reservations (security, connectivity, control) would MMC have about expanding cloud use?

**Response**: _____

_____

**Notes**: _____

**Q15**: Does MMC currently collect data from multiple sources (production lines, sales, suppliers, customers), and is that data ever analyzed together to discover patterns?

**Follow-up**: What patterns or insights would be most valuable for MMC to discover from its data?

**Response**: _____

_____

**Notes**: _____

**Q16**: Quantum computing is still in early development. Should MMC watch it from a distance for now, or begin preparing for it? What would be a sensible level of involvement for a medium-sized company?

**Follow-up**: Why do you say so? What problems do you think MMC could eventually solve with it?

**Response**: _____

_____

**Notes**: _____

## Section 7: Skills and Capacity

**Q17**: How would you rate the current IT and technical skills of MMC's workforce overall (1 = Very Limited, 5 = Highly Skilled)? Which technical skills are the strongest, and which are the weakest?

**Follow-up**: Can you explain the biggest skills gap that you see?

**Response**: _____

_____

**Notes**: _____

**Q18**: Does MMC currently have employees in a technology department that can deploy and maintain systems? If not, how are technology issues handled today?

**Follow-up**: Why or why not?

**Response**: _____

_____

**Notes**: _____

**Q19**: How willing and able do you think employees would be to learn new technologies such as AI tools, data analytics, or AR-assisted work? What training approaches (on-the-job, seminars, workshops, online courses) would work best?

**Follow-up**: Why do you think employees would respond that way?

**Response**: _____

_____

**Notes**: _____

## Section 8: Budget and Implementation

**Q20**: Does MMC currently have a set budget for technology investments, or would money need to be set aside specifically for this project? What would be a reasonable budget range for the initial stage?

**Follow-up**: How flexible is the budget for investments whose returns are not yet certain?

**Response**: _____

_____

**Notes**: _____

**Q21**: Rank the following from highest to lowest priority for MMC's first adoption phase: AI, Machine Learning, AR, IoT, Cloud Computing, Big Data Analytics, Quantum Computing. What is your reasoning for the top choice?

**Follow-up**: Why did that technology outrank the others?

**Response**: _____

_____

**Notes**: _____

**Q22**: What timeline do you consider realistic for implementing a first emerging technology project at MMC (3 months, 6 months, or 12 months)? What could delay the timeline?

**Response**: _____

_____

**Notes**: _____

**Q23**: How should MMC handle the risks associated with implementing emerging technologies?

**Follow-up**: Can you explain your concern? How do you think those risks could affect day-to-day operations if unmanaged?

**Response**: _____

_____

**Notes**: _____

## Section 9: Closing

**Q24**: Is there anything crucial we should know about MMC, its operations, or its preparedness for new technologies that we didn't ask about? Are there any documents you can share to support our review?

**Follow-up**: Can you explain that point?

**Response**: _____

_____

**Notes**: _____

**Q25**: May we contact you again for clarification and follow-up questions during the analysis phase? (Yes / No)

**Response**: _____

_____

**Notes**: _____

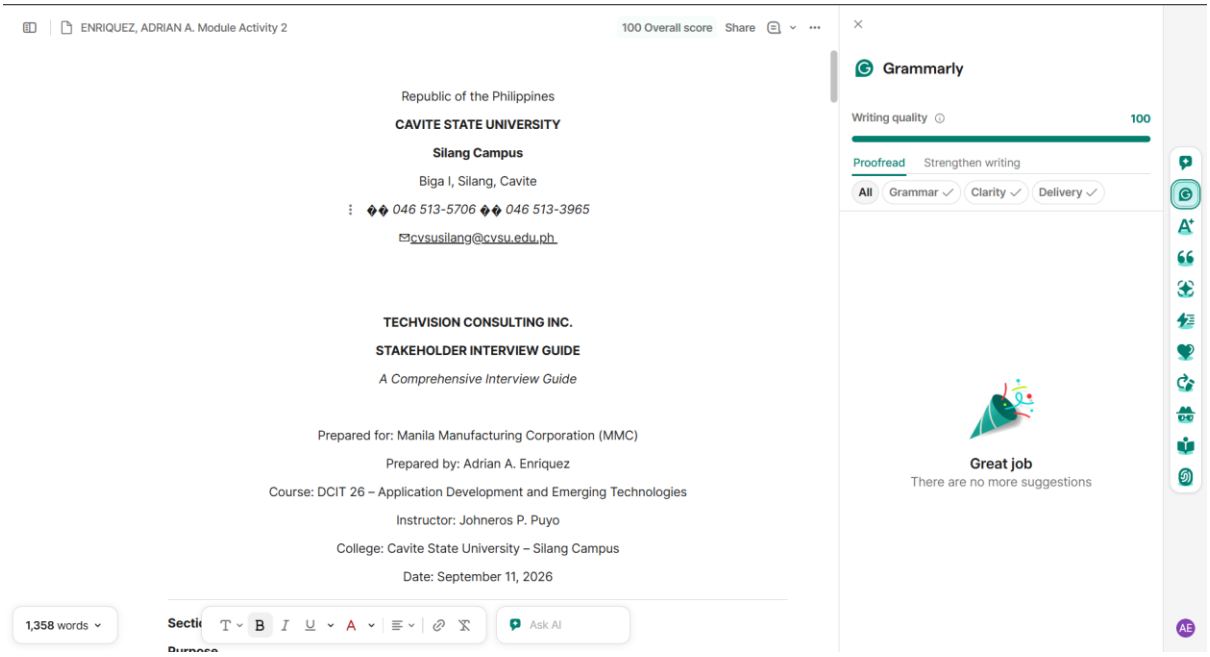

**Interviewer's Post-Interview Notes**:

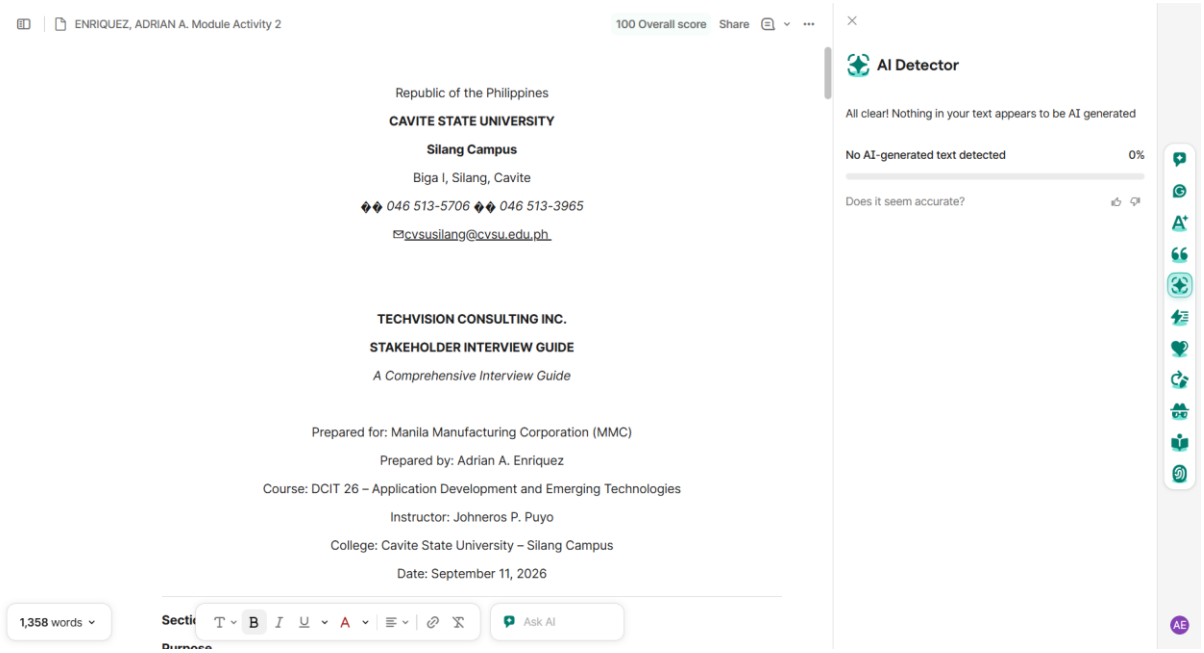

_____

_____

_____

## Section 10: Originality and Language Quality Assurance

**RUBRIC FOR EVALUATION:**

| Criteria | Excellent | Good | Satisfactory | Needs Improvement | Score |
|---|---|---|---|---|---|
| **Completeness of Sections** | All 9 sections complete and well-organized | 7-8 sections complete | 5-6 sections complete | Less than 5 sections | /15 |
| **Question Quality** | Questions are clear, relevant, and probing | Most questions clear and relevant | Some questions unclear or irrelevant | Many questions unclear or irrelevant | /15 |
| **Coverage of Technologies** | ALL emerging technologies covered thoroughly | Most technologies covered | Some technologies covered | Few technologies covered | /25 |
| **Alignment with Scenario** | Questions perfectly match the MMC scenario | Questions mostly match the scenario | Some questions match the scenario | Questions do not match the scenario | /10 |
| **Open-Ended Questions** | Excellent mix with effective probes | Good mix with some probes | Some open-ended questions | Few open-ended questions | /10 |
| **Professional Format** | Very professional, clean, and organized | Professional with minor issues | Somewhat professional | Disorganized or messy | /15 |
| **Practicality** | Questions are practical and usable | Most questions are practical | Some questions are practical | Questions are impractical | /10 |

**TOTAL SCORE:** ____ / 100
